The main content area has tabs for 'Meeting', 'Recording', and 'Telephone'. Under the 'Meeting' tab, there is a 'Schedule Meeting' section. Below that are two settings: 'Host video' (Start meetings with host video on) and 'Participants video' (Start meetings with participant video on. Participants can change this during the meeting.), both with toggle switches turned on. At the bottom, there is an 'Audio Type' section with a descriptive paragraph: 'Determine how participants can join the audio portion of the meeting. When joining audio, you can let them choose to use their computer microphone/speaker or use a telephone. You can also limit them to just one of those audio types. If you have 3rd party audio enabled, you can require that all'.
