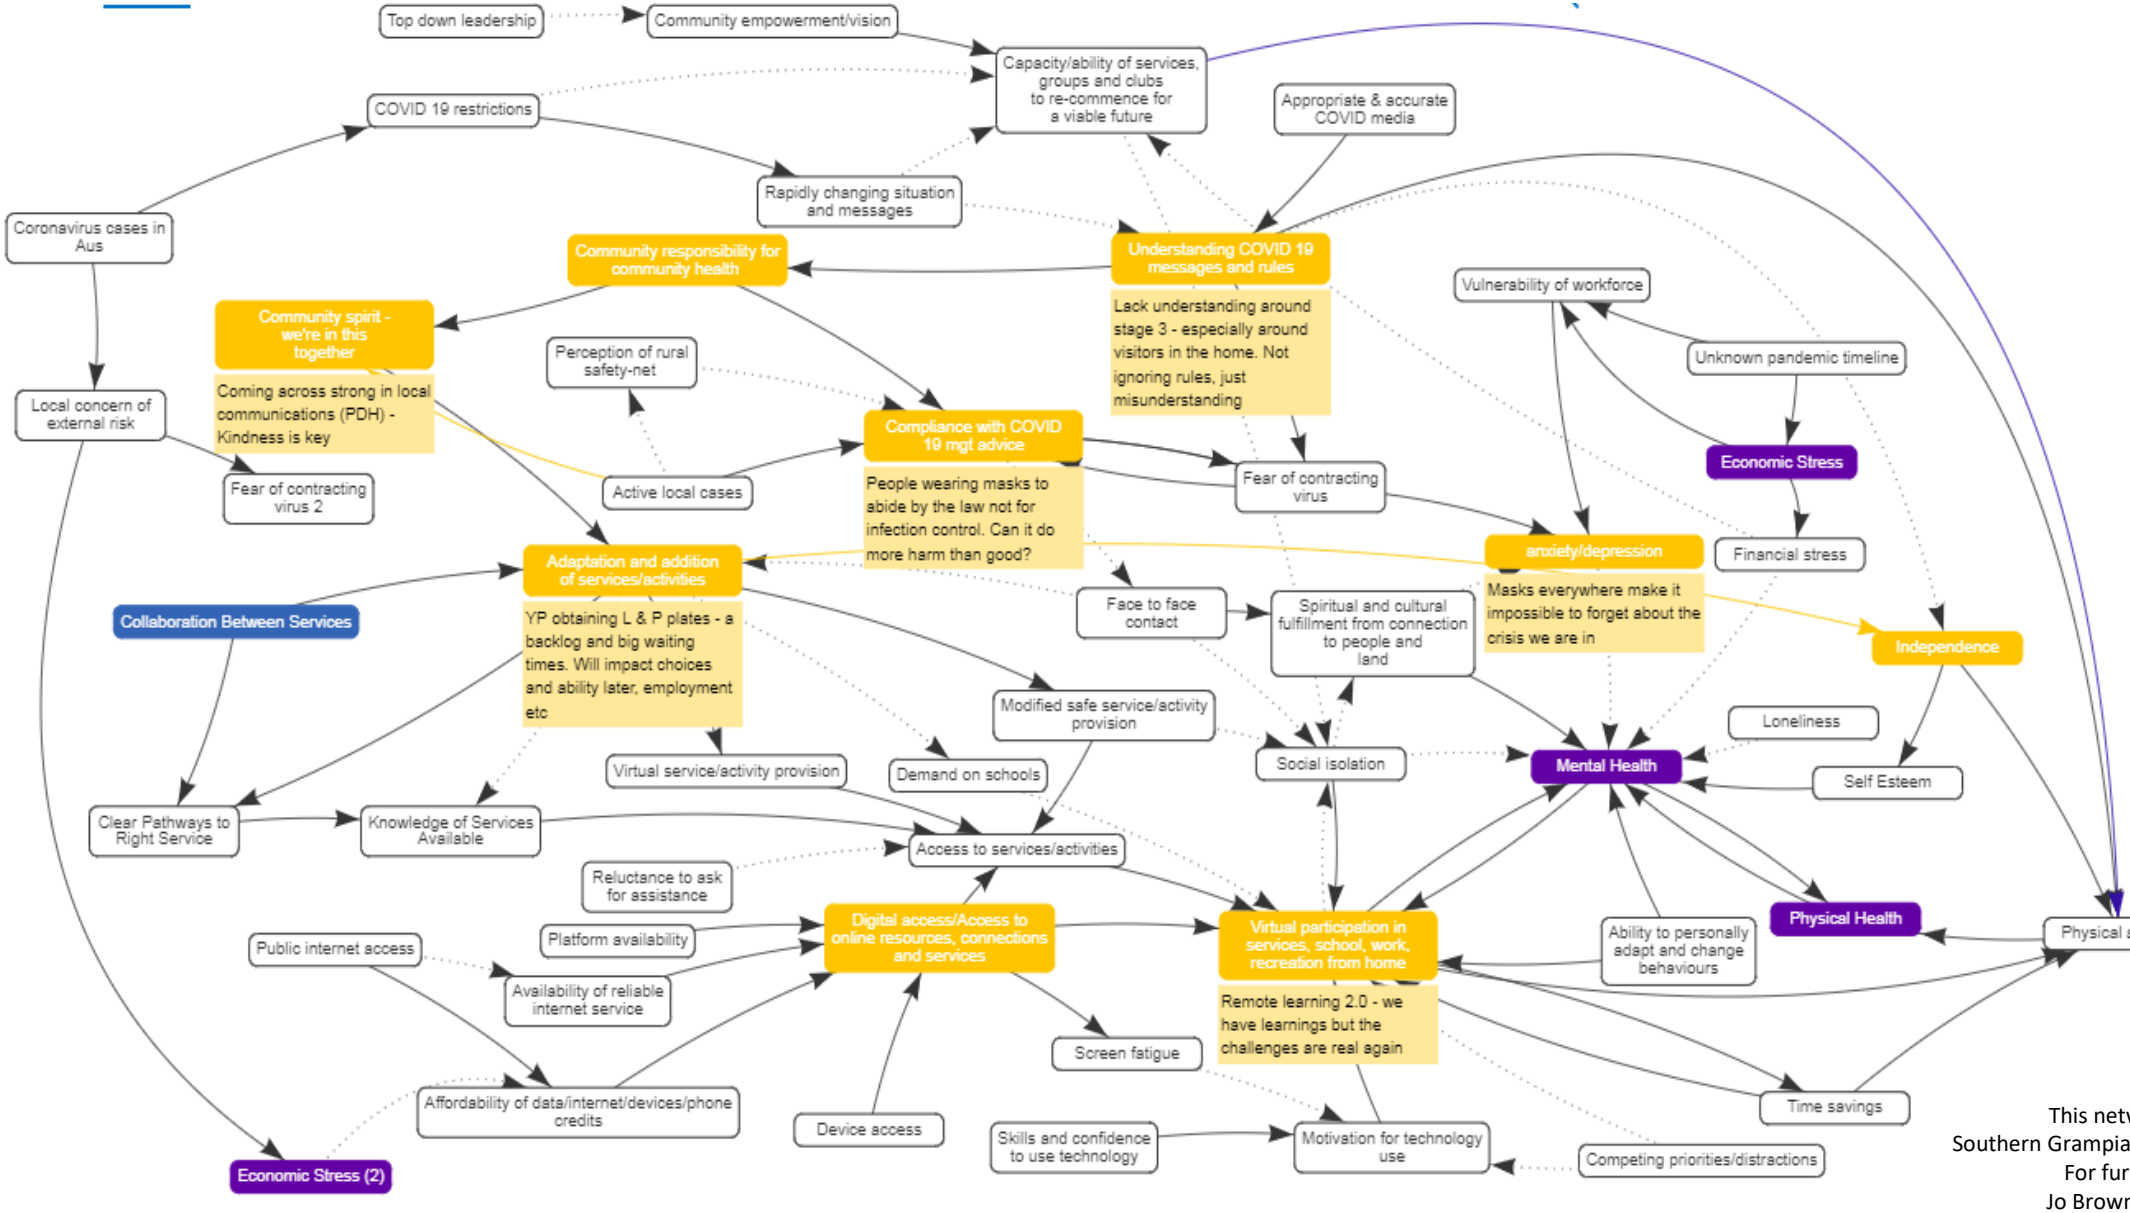
Changes to the system



Between meetings we captured the changes we have seen over the past 2 weeks via email contribution from group members.
These changes have been added to the Systems map developed by the group. Stories are added as notes attached to the variable.
For example:
Community Spirit: As more cases are were reported in Glenelg Shire there has been a focus on being kind to each other which has been reinforced by local leadership. There has also been some challenging times with increasing fear played out in anti-Melbourne feeling but this has been decreasing.
Mask wearing was taken up quickly in Glenelg Shire before mandatory requirements. Appears to be high compliance but also makes the situation very visible. There is also some ongoing discussion around effective wearing of masks as the community learns about the best protection rather than just wearing a mask to comply with rules.
There is a significant wait at VicRoads which is affecting L and P plate driver licensing. This is impacting the independence of young people as well as potential to limit education and employment opportunities.
The return to remote work and learning is bringing some familiar challenges with some adaptations retained from the previous phase assisting while others are showing fatigue and added stress returning to this stage.

This network is being facilitated by
Southern Grampians Glenelg Primary Care Partnership.
